THE BOXES

Research dossier

A period drama set at MIT in 1966, the year Joseph Weizenbaum built ELIZA.

The research reveals MIT in 1966 as a center of early computing, Cold War defense research, and rising antiwar tension. Project MAC operated high-powered mainframes on Technology Square while students protested the Vietnam War across Cambridge. Joseph Weizenbaum created the ELIZA program here to simulate nondirective Rogerian therapy on teletype machines. The film follows a university bystander watching faculty and office staff develop sincere emotional bonds with simple computer code. The bystander observes this growing human self-delusion with comedic irony.

THE BOXES

What the research found, in plain language, box by box. Every claim below is traceable to the sources listed under it.

SECRETARIAL LABOR PRACTICES

98% 9 items · 7 domains

Department secretaries maintained daily administrative operations across MIT offices. Female clerical workers managed correspondence, filing systems, and standard midcentury desk supplies. Archival inventories record typewriter equipment and paper records maintained by department assistants. These administrative laborers handled office communication while remaining separate from research hierarchies.

VIETNAM WAR CAMPUS POLITICS

97% 13 items · 11 domains

Cambridge saw active antiwar organizing and draft resistance throughout 1966. Student activists published independent newsletters demanding the withdrawal of American troops from Vietnam. Activist coalitions distributed radical circulars across local campuses and street corners. University press releases and police records tracked the growing schedule of campus demonstrations.

Carl Rogers developed person-centered therapy around reflective, nondirective conversational responses. Published transcripts from the 1960s showed therapists mirroring patient statements to encourage deeper disclosures. Weizenbaum adapted these conversational rules into the script rules for ELIZA. The resulting teletype program produced surprising therapeutic intimacy among campus users.

EARLY HACKER LEXICON

95% 16 items · 13 domains

MIT computing culture developed a distinct technical lexicon preserved in internal memos and early hacker dictionaries. Programmers used specific jargon like 'crock' and 'lose' to critique failing hardware and software. The Tech Model Railroad Club and Project MAC staff shared specialized terms for debugging and code revisions. These linguistic conventions circulated informally across AI laboratory offices.

Where this stands, and where it does not yet

Originality is claimed only relative to the titles above, never absolutely.

> The narrative follows a university bystander observing human self-delusion with comedic irony.
>
> No listed film combines a bystander point of view with a satirical tone and an administrative engine.
>
> checked against: Her (2013), Ex Machina (2015), Kinsey (2004), Oppenheimer (2023), Forrest Gump (1994)
>
> → Center the story on an MIT night-shift janitor who reads the ELIZA printouts and finds faculty confessions ridiculous.

> The creator acts as an active investigator dismantling his own shipped feature as an urgent moral duty.
>
> None of the inventor portraits combine the investigator point of view with deliberate self-sabotage of a functioning program.
>
> checked against: Oppenheimer (2023), To End All War: Oppenheimer & the Atomic Bomb (2023), Kinsey (2004), An Honest Liar (2014), 23 (1998)
>
> → Depict Weizenbaum interrogating the staff who confide in ELIZA, then intentionally rewriting the code to break the illusion.

A pure institutional tragedy where the exploited party is the creator horrified by executive weaponization of a toy.

The films frame creators as perpetrators or victims of their own hubris. None ends with bureaucratic greed capturing an intended parody.

checked against: Ex Machina (2015), The Island (2005), Oppenheimer (2023), A Beautiful Mind (2001)

→ Focus on the Defense Department funding office securing the ELIZA codebase after the inventor declares it a shallow joke.
